

In recent years, our country has also faced record floods, deep freezes, and hurricanes. And deadly wildfires have hit States beyond California.

Climate disruption is here. Congress has a responsibility to act boldly in response. The American Jobs Plan is a once-in-a-generation opportunity to meet the moment with a transformative investment in infrastructure.

We have the opportunity to build a clean-energy future that uplifts the communities who now suffer from the impacts of the fossil fuel industry. We must do it.

We must also recognize that communities of color have been hit first and worst by climate change. They must be at the front of the line for these investments. They must be represented in discussions on any infrastructure agreement.

We can afford to protect our planet, clean our air and water, and provide a better quality of life for communities all over the country.

We cannot afford an infrastructure bill that doesn't have climate at its center. We cannot afford a bill that doesn't invest in infrastructure that will create millions of jobs and serve the needs of our communities.

We need: clean energy, a resilient electric grid, electric vehicle charging, green affordable housing, zero-emissions public transit, climate smart ports, and more.

Our constituents did not send us here to back down when faced with climate deniers and deniers of taking any meaningful climate action.

If we don't do it now, when will it ever happen? This is our opportunity. Now is the time to stand up for the health and the well-being of our communities and our planet to say: No climate, no deal.

RECOGNIZING DISTRICT DIRECTOR BRIAN McDONALD AND THE MINNESOTA OFFICE OF THE SMALL BUSINESS ADMINISTRATION

The SPEAKER pro tempore. The Chair recognizes the gentleman from Minnesota (Mr. EMMER) for 5 minutes.

Mr. EMMER. Mr. Speaker, I rise today to thank Brian McDonald and his entire team at the Small Business Administration's Minnesota District Office.

In May 2020, at the height of the COVID pandemic, Brian took on an enormous challenge when he rose to the role of district director for the SBA's Minnesota region.

Brian and his team were charged with supporting Minnesota's 500,000 small businesses and their 1.3 million employees through one of the most challenging economic crises in our Nation's history. Under Brian's leadership, the SBA's Minnesota district office team facilitated critical loans, provided valuable training, and served as true warrior advocates for businesses of all sizes during this difficult time.

At the outset of the COVID-19 outbreak, Brian and I hosted a joint town hall where he helped my constituents understand how they could keep their small businesses afloat. Brian's participation was crucial, and his willingness to offer guidance and expertise is characteristic of his office's impressive work throughout the crisis.

Brian and his team in the SBA's Minnesota district office continue to work around the clock to help businesses in our State survive. We are grateful for all of their work, and we are fortunate to have such a dedicated SBA district presence in our State. I thank them for all they do.

CONGRATULATING MINNESOTA ASSISTANT PRINCIPAL OF THE YEAR ANGIE CHARBONEAU-FOLCH

Mr. EMMER. Mr. Speaker, I rise today in recognition of Angie Charboneau-Folch, assistant principal at Big Lake High School.

In April, Angie was named this year's Minnesota Assistant Principal of the Year by the Central Minnesota Association of Secondary School Principals. She received this honor after 15 years of service as a school administrator, including a decade at Big Lake.

Angie has been a longtime advocate for both students and educators during her tenure. As leader of Big Lake High School's Student Targeted Instruction and Goals program, better known as STING, she has ensured that students receive the additional instruction time and support they need. She has also worked to open the channels of communication between teachers and families through her Being Your Own Champion initiative.

I congratulate Angie on this remarkable achievement. I thank her for her years of dedication to the Big Lake community, and I know Minnesota students are better off because of her support.

HONORING THE WORK AND BRAVERY OF HALO TRUST AFGHANISTAN

Mr. EMMER. Mr. Speaker, I rise today in recognition of the bravery and sacrifice of the HALO Trust employees who were recently attacked in Afghanistan. Earlier this month, 110 demining workers in the northeastern Afghanistan province of Baghlan were attacked. Ten HALO Trust workers lost their lives and 16 more were injured.

HALO Trust staff is comprised of locals who work alongside American citizens around the world to clear the debris of war, especially landmines. Their work is vital in Afghanistan, where nearly 40 years of conflict has left the land littered with explosives and citizens living under constant threat of detonation. This forces locals to make an unimaginable choice: either let their families starve or risk their lives to farm dangerous land.

Thanks to the work of HALO Trust and the entire demining community, war-torn nations across the globe are being revitalized. Within the Herat province alone, HALO Trust workers have cleared over 600 minefields and

provided steady employment to 2,600 Afghan locals.

This devastating attack was an act of cowardice from an organization that feeds off instability and fear. I commend the profound bravery of the workers who face down death to rebuild their communities. I hope everyone will join me in recognition of their sacrifice.

THANKING TAMMY BIERY AND CAREER SOLUTIONS

Mr. EMMER. Mr. Speaker, I rise today to honor Tammy Biery, the executive director of the employment agency Career Solutions.

Electrolux had a long legacy in our home State, employing Minnesotans since 1946. In 1998, the plant produced 75 percent of all freezers sold in the United States.

In 2018, the business was St. Cloud's eighth largest employer, with nearly 900 employees. However, a year later, Electrolux consolidated their freezer production to South Carolina. Despite our efforts and the efforts of the community urging Electrolux to reconsider, approximately 760 employees faced layoffs.

To support these workers who faced separation from employment, Tammy and her employment agency, Career Solutions, went to work. After receiving an award from the State Dislocated Worker program, Career Solutions offered career counseling, on-the-job training, and interview coaching to 513 former Electrolux employees. By the end of 2020, 159 of those trainees were gainfully employed.

Thanks to the work of Tammy and the Career Solutions team, St. Cloud was able to weather the largest layoff in our history. I thank Tammy for that.

TERESA BOHNEN: A CAREER OF SERVICE

Mr. EMMER. Mr. Speaker, I rise today to recognize the career of Teresa Bohnen. Teresa is retiring this year as president of the St. Cloud Area Chamber of Commerce.

Teresa led the chamber for the past 23 years. During that time, she has been a staunch advocate for small business.

Under Teresa's leadership, the St. Cloud Area Chamber earned a five-star accreditation from the U.S. Chamber of Commerce the first year it became eligible and has maintained that rating ever since.

I thank Teresa for her service to St. Cloud, and she should enjoy her well-earned retirement.

HONORING REVEREND RONALD V. MYERS, SR., M.D.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. DANNY K. DAVIS) for 5 minutes.

Mr. DANNY K. DAVIS of Illinois. Mr. Speaker, I rise to pay tribute to the Reverend Dr. Ronald Myers, who was one of the real reasons that President

Biden was able to sign into law Juneteenth as a national holiday.

Reverend Myers was founder of numerous medical and cultural organizations and a committed physician, serving the poorest Americans through clinics in Tchula, Belzoni, Yazoo City, Indianola, Greenville, and Tupelo, Mississippi.

Doc was also a jazz musician, composer, and human rights activist. The New York Times stated: "There aren't many doctors like Ronald Myers, a jazz-playing, Baptist-preaching, family practitioner whose dream has always been to practice medicine in the kind of place most other doctors wouldn't even stop for a tank of gas."

In 1994, a group of community leaders from across the country gathered at Christian Unity Baptist Church in New Orleans, Louisiana, to work for greater national recognition of Juneteenth, a holiday celebrating the end of slavery. Dr. Myers was elected chairman of this advocacy effort, which led to the establishment of the National Juneteenth Observance Foundation and his recognition as the leader of the modern Juneteenth movement in America. Doc was instrumental in the passage of 45 of the 49 State and District of Columbia pieces of legislation naming Juneteenth as a day of observance in this country.

Working with the Congressional Black Caucus, which included Illinois Senator Barack Obama and Representative DANNY DAVIS, he sought legislation to recognize Juneteenth independence, hosting the annual Juneteenth prayer breakfasts.

□ 1015

He established the Washington Juneteenth National Holiday Observance and the National Day of Reconciliation and Healing from the Legacy of Enslavement, which includes the National Juneteenth Black Holocaust "Maafa" Memorial Service.

Dr. Myers organized the National Association of Juneteenth Jazz Presenters and the Fellowship of Creative Christian Jazz Musicians. Under his leadership, the Washington Juneteenth congressional event was held by the National Juneteenth Observance Foundation, Juneteenth America, Inc., and the National Association of Juneteenth Jazz Presenters.

An accomplished jazz pianist, trumpeter, and composer, Dr. Myers performed across the country promoting "June is Black Music Month!"—Celebrating Juneteenth Jazz—"Preserving Our African American Jazz Legacy!"

For over 20 years, he met with State politicians, local Juneteenth organizations, and community leaders.

Charles Taylor, author of Juneteenth, said: "Doc would give a copy of my Juneteenth book to every Governor who made Juneteenth a holiday or observance. He even gave Sarah Palin a copy when she was the Governor of Alaska after her State recognized Juneteenth."

At an award ceremony at the Beverly Hills Temple of the Arts at the Saban Theatre, founder Rabbi David Baron said: "Reverend Dr. Ronald V. Myers is an outstanding living model of all the values for which Martin Luther King stood."

Thanks to Steve Williams, who has carried on Dr. Myers' work; and my staffer, Dr. Caleb Gilchrist, who has worked closely with him.

Thank you, Dr. Myers, and may you rest in peace.

KANSAS IS THE BREADBASKET OF THE WORLD

The SPEAKER pro tempore. The Chair recognizes the gentleman from Kansas (Mr. MANN) for 5 minutes.

Mr. MANN. Mr. Speaker, I rise today to recognize Kansas farmers for their long hours during this year's wheat harvest and for their work to produce food for people all over the world.

With more than 15,000 wheat farms across the State and 5 million acres of wheat in the Big First District alone, Kansas leads the Nation in wheat production, is the largest exporter of hard red winter wheat, and is aptly named the breadbasket of the world.

The United States exports that wheat to more than 100 countries around the world, and some of that wheat from Kansas ends up abroad under the U.S. food assistance programs, like Food for Peace. In fact, it was the Kansas Farm Bureau who began sending surplus grain to those in need around the world, continuing U.S. leadership in addressing world hunger.

As I reflect on my own time on our family farm in Quinter, Kansas, I am reminded that harvest season is about more than just harvesting the crop. For Kansas farm families and communities, harvest is about coming together.

Harvest is when we share tractors and other equipment with our neighbor when theirs gets stuck. Harvest is when a grandmother takes food to the field so the rest of her family doesn't have to leave the field for a lunch break. It is when a father takes his child out on the combine to show him how the work is done. And it is when we reflect on our advancements in agriculture, thanks to land-grant universities, like the wheat breeding research at Kansas State University, yielding high-quality and plentiful harvests around the world.

Wheat harvest is a time for Kansas to be proud of the great strides they take to feed, fuel, and clothe the world. At the end of the season, we look back and know that each agricultural success is inexplicably tied to our Kansas values of faith, family, community, and grit. While we are at work here in Washington, they are back at home making the world go round, and for that we owe farmers our sincerest thank you.

THE RIGHT TO LIFE IS SELF-EVIDENT

Mr. MANN. Mr. Speaker, I also rise today in support of one of the most

basic functions of any government, the right to life.

Our Founding Fathers wrote 245 years ago, "We hold these truths to be self-evident that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness."

To them, the right to life was so overly obvious that they called it self-evident.

But, today, in America, some policymakers insist on denying the right to life to millions of Americans. Instead, they diminish that right through murderous abortion policies, policies that fail to recognize life until a child lets out his or her first cry in the delivery room, policies that justify abortion based on the belief that any unborn child may have Down syndrome, and policies that funnel taxpayer dollars to funding abortions and abortion services.

Today's technology and science has shown us proof of life inside the womb. We see 3D ultrasounds of a baby sucking her thumb and moving around. We know unborn babies can experience pain as early as 12 weeks. At 20 weeks, we can reveal if a baby is a boy or a girl.

Yet some of our country's leaders still proceed to support policies that devalue and eliminate the innocent child's life. For decades, these elected officials have spent more time protecting the right of potentially endangered species, like the lesser prairie-chicken or sea turtle eggs, than they do protecting unborn babies, human babies.

But not to me. I strongly believe life begins at conception. I believe every life matters. I support adoptions, foster care, and crisis pregnancy centers that work tirelessly to care for mothers and their babies. I have cosponsored pro-life legislation, including H.R. 18, the No Taxpayer Funding for Abortion Act, permanently prohibiting Federal funding for abortions and abortion services. I even introduced my own, H.R. 714, which would require the executive branch to notify Congress and the American public before issuing any new executive order pertaining to pro-life provisions and the right to life guaranteed by the 14th Amendment of the U.S. Constitution.

Devaluing the life of unborn children has desensitized our Nation, and I pray we soon wake up and realize the horrors it has done. It is time to stop using taxpayer dollars to fund abortion services and focus on lifesaving resources that value the life of both the mother and the child. The right to life is self-evident, and I will fight to protect it at all costs.

REMEMBERING ROBERT KALEIMOMI KEKAULA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Hawaii (Mr. KAHELE) for 5 minutes.
